COMBINING BEAUTIFUL DESIGN WITH LONG-LASTING SIDING PERFORMANCE

Mix & Match

WPS Siding Systems complete selection of exterior products are tailor-made to take creative advantage of the exciting mix-and-match approach to exterior wall design - by combining various products, styles, and colors to create truly unique exterior designs. Using various combinations of horizontal and vertical flush siding as well as horizontal lap siding can make a bold statement. Adding soffits and trim deliver just the right accent. All of our options can be coordinated perfectly for a complete package. Our collection allows you to rely on a single, trusted source for virtually every exterior siding product you desire.

Our goal is to help our customers discover the finest siding and trim that will transform the appearance of your building with our wide range of colors and finishes.

Color Leadership

Color not only has the ability to affect the way you think, feel, and act - it can also add value and personality to your building. This is why it is important to find color combinations that are beautifully balanced.

Siding options, trim, and color selection all have a profound impact on the overall look and feel of a building exterior. We have a wide range of colors to satisfy nearly every preference. All of our products have UV protection built in to maintain vivid colors and virtually maintenance-free performance.

FLUSH SIDING AND LAP SYSTEM

Choice of panel sizes and thickness

WPS siding offers panels in 4"-24" H, 8'-12' W, and 5/16", 3/8", or 1/2" thickness to allow our clients the largest range of options to fit all designs and styles.
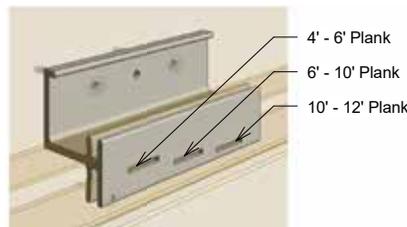

More Durability

WPS siding panels exceed industry standards in all water, wind, and impact criteria. Panel finishes along with UV protection provide long-lasting hues and protection against surface scratches which deliver strong, solid panels that stand the test of time.
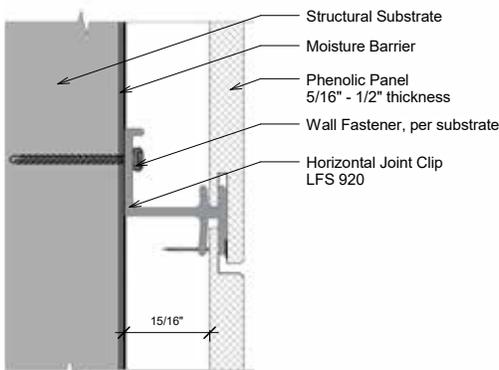

More Freedom

No paint, no stain, no worries. You'll save time since our products require little to no maintenance. You'll gain freedom from fading paint, mold, and rotting. You'll save yourself from the aggravation and expense of insect damage since our products are termite resistant.
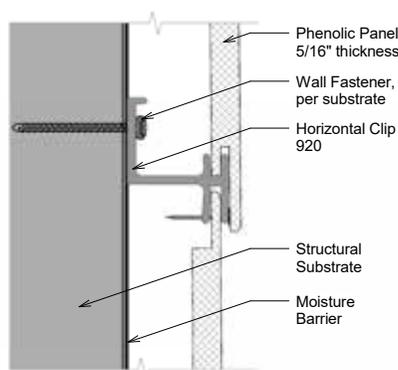

More Value

WPS products install faster than natural products, keeping costs low and building values high. Making installation easier, our clips create a 1 inch air gap for ventilation so no furring is required. Our products provide the timeless and distinguished looks of solid color, metallic, and wood grain finishes. If you are looking for an exterior siding that speaks simply and elegantly, WPS siding products can help you make a lasting impression. While our experienced team is committed to providing the highest quality siding products in the marketplace today, we are also extremely proud that our siding products surpass expectations in other meaningful ways.

HIGHER STANDARDS AND GREATER REWARDS

This starts with a comprehensive array of exterior siding products that allow you to express your unique personal style. WPS siding products deliver the highest standards in selection, beauty, and performance. In fact, WPS siding systems offer the broadest selection of exterior solid phenolic products, styles, and colors to achieve a full range of design options. No other company can match WPS's portfolio of products. With all of our siding options, we offer our customers the freedom to play with style, color, and texture. The freedom to be creative, to mix and match, to think beyond just walls. Our customers will appreciate that we are providing them with the products and expertise to achieve their vision - no matter what that vision may be. Achieving higher standards means focusing on our extensive industry experience to help you navigate the challenging cladding market. We pledge our full support to our contractor/installer customers with educational and training opportunities.
